Subject: Re: Intervenor Status Re: Mayo B YEC Energy Project & Operation Certificate Application Hearing Process

Dear Ms. Smart,

Please accept this email as my formal request to be granted intervenor status in the above referenced public hearing process. I am interested in all aspects and issues related to the Mayo B Project.

In particular I am concerned about :

- 1) Capital costs / cost over runs
- 2) Projected long term sustainable annual power production.
- 3) Possible financial and scheduling impacts / effects that this Project may have on the development and implementation of the Net Metering (NM) and Independent Power Production (IPP) policies that are currently being considered by the Yukon Government.

I also request that my email address be changed for all further communications from all parties to: *pwpeng@northwestel.net*

I doubt that I will be introducing any evidence. I will likely submit interrogatories and depending on the responses to my and other's interrogatories I my wish to cross examine witnesses.

Sincerely: P. W. Percival, P. Eng.
