Yukon Utilities Board

Box 31728

Whitehorse, Yukon Y1A 6L3

Attention: Mr. Bruce McLennan, Chair

Re: YUB Letter July 5, 2012

Dear Mr. McLennan:

Having reviewed Board letter above, UCG would like to offer these comments:

1. We do not have particular logistical problems with the outline of this new schedule to accommodate the YEC request for an extended period of time to answer interrogatories from the Board and other parties.

2. We do, however, ask the Board to ensure that the YEC provides full disclosure to all questions asked and do not use rhetorical excuses nor out of scope positions. The Board has not set out an issue list, so we propose all issues are on the plate.

3. To not provide full answers with this extra time already provided, will only further delay the process, as interveners will have to file motions on incomplete responses.

4. Accordingly, UCG requests the Board, with their decision on this motion by the YEC, makes provision for parties to argue for better disclosure should YEC IR responses not be complete as has been their practice in the last several regulatory proceedings.

5. UCG also requests some type of cross reference package to make it easier for parties to find answers, when YEC utilizes the "see other response for an answer".

Yours truly,

Roger Rondeau
