Attn: Mr. Bruce McLennan, Chair

Dear Mr. McLennan:

**Re: Yukon Energy letter dated September 19, 2012 and YUB letter dated September 19, 2012**

Thank you for your prompt decision regarding the Resource Plan information requests.

With regard to Mr. Morrison's letter dated September 19, 2012, I feel compelled to set the record straight as well – as I also did directly with Mr. Morrison.

About half of the questions I provided to Yukon Energy staff in writing as a courtesy prior to the meeting scheduled to run me through the numbers, relate directly to the analysis of the cost of wind energy compared to the other near term options. While I have been pointed to some of the source information used, I have still not seen how the \$0.40 per kWh was calculated. At the meeting I indicated that I would accept whatever format in which the information was available – since I cannot possibly know the details of the modeling used to ask the most appropriate questions.

With regard to Mr. Morrison's comment about my "two pronged approach" it suggests a level of deviousness which I never have and never will stoop to. I always expected the Resource Plan input to be a strictly public process and not a GRA issue, and although I have said so, Mr. Morrison chooses not to believe me. So now it has been added to my GRA list.

Finally, Mr. Morrison must be confusing my participation in DSM planning with the Resource Plan process. I have been unable to attend a single Charette related to the Resource Plan due to other work commitments, but I have been able to attend most DSM planning meetings.

Yours,

John Maissan
