Re: Information Requests (IRs) to YEC Concerning the Power Purchase Agreement (PPA) between YEC and Minto Exploration Ltd.

The following are my second round of IRs to YEC regarding the above referenced PPA:

2-1 Re: YEC Application; **5.1.6 - Due Diligence**, pp 17 & 18.

Please provide copies of these two reports along with any analysis and all internal and external communications relating to them plus the contracts to have these activities undertaken.

2-2 So as to reduce the risk to itself, other Yukon electrical rate payers and the tax payers of Yukon, did YEC ever consider the possibility of wholesaling the electrical power required to operate the Minto mine to a third party "broker" that would have superior financial resources and business capabilities to negotiate an independent PPA contract with the mine? If not please explain why.
