Mr Bruce McLenna Chair
Yukon Utilities Board
Box 31728
Whitehorse, Y.T. Y1A 6L3

Sunday, March 30, 2014

Mr Chairman and members of the YUB,

I have one question to you. Why would you even contemplate installing apparatus that would continue the use of petroleum products and their destructive impact upon our climate and our lands?

We live in a land so rich in renewable energies; wind, geothermal, hydro and sunlight. It makes no sense that incredible amounts of money be invested in anything but the development of these resources and their necessary infrastructure to serve our communities.

The Yukon is in a position to become a leader of the country in developing independent renewable energy resources. It is time we moved into the realities of the 21 century.
