To: Yukon Utilities Board

Hi,

My name is Peter Mather and I am a resident of Whitehorse for the past 30 years. I can't make the public session on Monday, but would like to add my two cents.

I strongly believe we must do more as a society to prevent Climate Change. I would like to see the Yukon Utilities Board should invest in renewable energy and not LNG. I am willing to pay more on my electricity bills to see that happen.

Thank you for your time,
Peter
