

LNG disguises fracking

To: Yukon Utilities Board

My name is Sandy Helland. My primary address is 2 McDonald Road, Whitehorse.

I am commenting to YUB to warn of deliberate tampering of data being collected regarding fracking, which produces LNG.

There is something very wrong with an industry the requires a "non-disclosure clause" in their contract to frack.

That non-disclosure clause disqualifies our freedom of speech and violates the Constitution of Canada.

Biased information is being collected and judgments made without the "life ever after" side mentioned, included.

Our Yukon Select Committee Regarding the Risks and Benefits of Hydraulic Fracturing committee are being influenced by warped, misleading information about fracking due to the non-disclosure clause; they are prevented from getting the full story.

For this committee to advise fracking is safe is preposterous because the underhanded data is stacked.

Sincerely,

Sandy Helland [\(867\) 335-3589](tel:8673353589)
