Dear Yukon Utilities Board,

Thank you for the opportunity to share my thoughts.

I strongly support an alternative route moving away from LNG. I don't think LNG is sustainable in so many ways.

I am very frustrated with such a lack of motivation by the people who are in a position to create change, not creating change. I want the YUB to be a leader and demonstrate how working with the community and its desires can be possible. How working with alternate energy professionals can be productive and beneficial.

Please do not go forward with your LNG project. In my opinion, it is a step backwards.

Thank you for your time,

Vanessa Brault
148 Dalton Trail
Whitehorse, YT

Please share my e-mail during the meeting Monday night. Thank you.
