Subject: Re: Carmacks - Stewart Crossing Transmission Project

Yukon Utilities Board,
 Attention:
 Ms D. Lemke,
 Executive Secretary

Please accept this email as my application for intervenor status for the YUB's Part 3 Review of the above referenced project.

At this point in time, I do not plan to hire legal services. However, I may require legal assistance as the process advances. I am currently negotiating to hire a local Economist but I find there is insufficient time to do so (BO 2007-4 issued late in the afternoon 07/04/09 with reply arguments due 07/04/10 and then intervenor applications by 07/04/13 - this I submit is unfair and inadequate notice) and still meet the cut off date of to day for providing his qualifications and retainer letter. I cannot possibly provide this information before the evening of 07/04/17. I need an economists services to assess business risks associated with future metal market prices.

If at all possible, I hope to file evidence relating to the cost to construct power transmission lines and the market risks relating to metal prices. However, I don't see any provisions within the current Schedule of Proceedings that permit the submission of intervenor evidence or for YEC to make IRs and then for me to respond to YEC's IRs. Indeed, with the very restrictive time lines imposed it will be very difficult if not impossible to prepare the evidence I would hope to file.

Sincerely,

P. W. Percival, P. Eng.
