Subject: Clarification on IR response requested

Attachments:

Yukon Utilities Board

Attn: Shay Smart

I am not sure what the correct procedure is for requesting a clarification on an IR response, so I will put it to you and request appropriate direction please. If the utilities could provide the clarification without formal process that would be appreciated.

The IR is LE-YEC/YECL-1-31 (b) to (g). The question asked for the number of distribution extension projects towards which individual non-industrial customers paid in excess of certain amounts each. From the responses it is not clear whether the numbers of projects listed are for those in which customer contributions in total exceeded the specified amounts, or whether the project numbers listed are indeed projects toward which the individual customers involved in these projects paid the specified amounts or more each.

Clarification is requested, and if the responses submitted provide the number of projects for which customer contributions in total exceed the specified amounts, a corrected response providing the number of projects in which individual customers contributed the specified amounts or more each is requested.

Respectfully submitted,

John Maissan
