[221-07678-00 Air Quality Assessment DRAFT June 13.pdf](#)

Hi Liz,

Just to update from our telephone conversation from a couple weeks back...

We are in receipt of the draft Air Quality Assessment from our consultant WSP for the thermal operations at our Whitehorse Rapids Generating Station. I have attached the draft AQA and hope to have the HHRA to you next week once it is drafted. Please disregard the yellow highlighting in the attached file. It seems to be an artifact of the pdf processing and will ask WSP to rectify.

We have been working as fast as we can to get this assessment work completed so that we can revisit a potential project configuration for your consideration prior to entering the YESAB PSE process.

As we discussed, we would greatly appreciate your Department's consideration and that of your expert consultant in reviewing these two reports over the next few weeks to see if we have something that can proceed into the Ex. Comm. Screening Process mentioned above. Happy to provide access between your consultants and ours if that aids in their review and advice to you. Always open to any conversation your team would like to have directly with YEC and/or WSP as your review proceeds.

Thanks for your time.

Regards,

Travis

Sure. How is 2 pm or later on Monday look for your team?

Would it be convenient for us to come up to your office?

Hey Travis- Can we push this to early next week? Friday doesn't work and tomorrow is also quite busy on our end.
Liz

Thanks for your reply Liz.

Any chance Friday before 11 am or after 1 pm might work for your team? If not, we can try to make tomorrow work, but tomorrow is looking a bit jammed at the moment.

Thanks.

Travis

Hi Travis- Apologies for the delayed response, the morning of Wednesday, March 1 looks like a good time if you want to go ahead and send out that invite.
Thanks,
Liz

Hi Elizabeth,

We were wondering if you and your colleagues would be available for a brief meeting to follow up on our discussion from January regarding work to assess thermal capacity at the Whitehorse Rapids Generating Station.

We would just like to provide an update on our progress to prepare a technical memo for your team's review and check in on how things are shaping up at your end of things to prepare for the review. Maybe 30 minutes would do.

Could you let me know when you might have some time next week to meet? I can then send out an invitation to everyone.

Our current openings include:

Wednesday March 1 – before 11 am or after 2 pm

Friday March 3 – before 9:45 or after 11 am

Thanks for your time.

Regards,

Travis

Subject: Yukon Energy - Whitehorse Thermal

When: January 12, 2023 9:00 AM-10:00 AM (UTC-07:00) Yukon.

Where: Second Floor Boardroom, Yukon Energy

Hi everyone,

Coming out a conversation between Bryna and I, I'm scheduling this conversation for the new year.

The goal of the meeting is to share and discuss the operating and regulatory context for thermal electrical generation at Whitehorse Rapids Generating Station.

Please forward invite as appropriate. We can set up a Teams link if needed.

I took liberties in developing a Draft Agenda

1. Introductions
2. 10-Year Resource Plan and energy demand in the Yukon (now and projected)
3. Role of thermal to meet winter demand
4. Thermal facilities: installed and rental generation
5. Work in progress - AQ modelling in Whitehorse and generation options
6. Current and future AQ permitting
7. Next steps
