Board members and its' legal adviser:

UCG has problems understanding why these letters and information can simply be added to the record, no questions asked. We are aware that under the rules, comments can be provided to the Board by interested parties, but how is this information to be processed to enshrine fairness or natural justice?

What we do not understand is that when the UCG submitted letters from concerned citizens and related documents regarding the history and complications of the Atlin Project, we had to jump through all kinds of hoops to even get the information in for discussion, only to have all of the evidence thrown out at the hearing.

It would appear to us that double standards are often used by this Board and its' legal adviser...that there is a spirit of entitlement for the utilities and a privileged few.

A serious response is requested, not simply a brush-off.
