June 5, 2008

Ms. Deana Lemke, Executive Secretary
Yukon Utilities Board
Box 31728
Whitehorse, Yukon Y1A 6L3

Dear Ms Lemke

Re: YECL 2008 and 2009 Rate Application ("Application") Intervention

Pursuant to the process established by Board Order 2008-4 Yukon Energy is seeking intervenor status in respect of the Yukon Electrical Company Limited (YECL) application for approval of Revenue Requirements for 2008 and 2009.

Yukon Energy intends to test the revenue requirement and rate increases requested in the Application to ensure that the rate increases requested fairly reflect YECL's prudently incurred expenses, and that the rate impact on electrical customers throughout Yukon including Yukon Energy's customers are minimized. This will include testing the revenue requirement implications that arise from YECL's forecast of sales, and costs including fuel, operating and maintenance, amortization, and capital costs. Yukon Energy also intends to address matters arising out of the Application related to the orderly planning of the integrated systems in Yukon.

Yukon Energy will be attending the pre-hearing conference set to take place on June 12, 2008 and intends to actively participate in all aspects of the process established in Board Order 2008-4.

The contact information for distribution of documents to Yukon Energy is attached.

Yours truly,

David Morrison
