

October 29, 2021

Mr. Richard Buchan, Chair  
Yukon Utilities Board  
Box 31728  
Whitehorse, Yukon Y1A 6L3

Dear Mr. Buchan:

**Re: Yukon Energy 2021 General Rate Application – YEC’s Final Argument – Error Correction**

---

On October 12, 2021, YEC filed its Final Argument regarding YEC’s 2021 GRA.

After reading UCG’s Final Reply Argument YEC identified an error in its Final Argument.

On page 8 of section 1.1.1 of the Final Argument YEC noted the following:

AEY provided Yukon Energy with its forecast power purchase estimate at 345.9 GW.h for 2021. Yukon Energy’s forecast is 2.4 GW.h, or 0.7% higher, than the AEY estimate provided. The 2021 wholesale forecast was prepared based on multi-variate regression assessments of monthly wholesales changes at normal weather conditions. It also reflects incremental forecast Micro Generation for 2021 which reduces forecast wholesales. Given that the forecasts are very close, and AEY’s forecast is only for business planning purposes, YEC’s wholesale sales forecast of 343.5 GW.h for 2021 test year is reasonable and should be approved. [underline added; footnotes are omitted]

As noted in this quote (see also page 2-6 of the Application) AEY provided Yukon Energy with its forecast power purchase estimate at 345.9 GW.h for 2021 and YEC’s wholesale sales forecast for 2021 test year is “343.5 GW.h”. Therefore, YEC’s forecast is 2.4 GW.h or 0.7% lower than AEY’s forecast.

Accordingly, YEC’s Final Argument had an error and the underlined text as referenced above should read “2.4 GW.h, or 0.7% lower than the AEY estimate”.
