**Re: Yukon Energy Corporation - YEC Application for Energy Project-Battery Storage
UCG Registration as Intervenor**

Dear Ms. Lemke and Board Members:

The Yukon Utilities Consumers' Group (UCG) would like to registers as an intervenor in the proceeding to review the Battery Storage application submitted by Yukon Energy Corporation (YEC). We plan to participate in all aspects of this rate hearing.

The nature of UCG's participation in this proceeding is to protect the interests of residential and small business consumers of electricity in the Yukon. Of particular concern in the proposal is exactly who has contributed money for this proposal and for which part of the project, how future environmental concerns will be handled, and what alternatives were looked at.

UCG is particularly interested in more fully understanding when and how ratepayers will be impacted, both short and long term, by the proposed storage system.

UCG has retained the services of Roger Rondeau as a regulatory consultant to oversee this proceeding given his prior experience in YUB proceedings concerning the request for operating certificates. As he is very busy with the GRA, UCG may need the services of Mr. Pat McMahon to assist with this intervention. We will contacting the Board on this shortly.

Until more information is provided through the information request process, it is too early to tell whether UCG will need to submit additional evidence to be placed on the record.

All communications related to this application and its review should be copied to myself (rrondeau@northwestel.net).

Regards,

Roger Rondeau
for UCG
